

Individual Ketamine Assisted Psychotherapy Therapy Transformed & The Be.ing Human Community

If you are looking for more general information or FAQ's please reference those documents

We have created a boutique niche approach to individual ketamine assisted psychotherapy. Unlike the larger ketamine clinics, we focus on individualized care and care plans that are directed by our client. We believe that ketamine used in safe and ethical ways can have profound healing.

Our individual work begins with a free 15 minute consultation to identify if we are the right fit for you. We then schedule a full psychological evaluation focusing on your goals and intentions for seeking treatment with us and why you are interested in Ketamine Assisted Psychotherapy. During these interactions we also are hoping to create emotional safety, understanding of our clients goals and how to provide the highest level of psychological care. Each touch point between client and provider creates safety also in our subconscious.

Each client will also work directly with a medical provider for a full medical evaluation to establish rapport and connection around medical safety, dosage and creating a collaborative approach to ketamine care that includes a team of highly trained providers.

Individual sessions are available at the SLC office on Tuesdays and Thursdays from 10:00 AM to 12:00 PM and 12:30 PM to 2:30 PM.

- Medical Evaluation \$200
- Psychological Evaluation \$250
- Sessions: \$550/session (Includes trained Ketamine Assisted Psychotherapist + Injection)
- 60 Minute Kap Integration \$200 (optional) we also welcome clients to work with their own individual therapist after their ketamine work.
